## DODGE PROMASTER 2500/3500

>2015 VAN ONLY  
REAR AXLE

PRODUCT SHEET

# PRODUCT SHEET

The Dodge Promaster 2500/3500 is available with a full 2-corner air suspension system for the rear axle. The Promaster 2500/3500 is an ideal candidate for the use of air suspension systems. Our VB-FullAir 2C air suspension system is not just available for new vehicles, it can also be retrofitted.

## VB-FullAir control

The VB-FullAir system comes with an electronic control unit called VB-ASCU (VB-Air Suspension Control Unit). This unit automatically monitors and corrects the vehicle's ride height. This ongoing process of monitoring and correction – which is unaffected by the load being transported – ensures safer vehicle handling and increases comfort.

## Software

The electronic control unit is compatible with the vehicle electronics and ESC system of the Dodge Promaster 2500/3500. Thanks to the range of different software variants, the VB-FullAir system can be adapted to specific vehicle applications. The use of the Internet helps to provide support across the globe.

## Changing the height

The entry/loading platform height can be raised or lowered when the vehicle is at a standstill, allowing passengers to comfortably enter and exit the vehicle and goods to be conveniently loaded and unloaded.

## Benefits of VB-FullAir:

- Constant ride height
- Increased comfort
- Better driveability
- Increased stability
- Comfortable transportation of passengers
- Kneeling function for allowing passengers to enter and exit the vehicle
- Better protection for fragile/delicate goods
- Kneeling function for loading and unloading goods
- Less wear on tyres/brakes
- Spare wheel remains under the vehicle

- Memory

## Delivery and maintenance

The VB-FullAir system for the Promaster 2500/3500 can be supplied and maintained by the VB dealer network.

The VB-FullAir system is low-maintenance and your VB dealer can advise you of any maintenance that your vehicle requires.

## Factory option

Important: The VB-FullAir system for the Promaster 2500/3500 is available for VAN only. In order to be able to install the system, an exhaust modification is required (not included).
